Kl. 14.15-15.00 UiB there is a meeting for all employees online about the Corona-situation, in Norwegian. This meeting will be recorded, so you may look at it later.

1245-1250 Information sharing

-The corona situation – home office and 0830 CIH morning meeting is likely to continue for 2 more weeks. We are told there might be some changes in restrictions, and must wait until this afternoon before we know.

-We have scheduled a strategy meeting to 7th December – it is difficult to plan due to the corona-situation, but will be planned by a smaller group (Ingunn, Ingvild S, Anne Berit, Thorkild and Bente) at CIH on Tuesday 24/11; afterwards you will get more information about this event.

1250-1330 Presentation by Professor Tehmina Mustafa: Laboratory work at CIH; a challenge Projects on Tuberculosis – Post primary tuberculosis – and antibiotic resistance

We enjoyed the presentation very much; she performs interesting studies with excellent ideas and plans. The comments were very positive from the researchers at CIH.

Tehmina told she is not allowed to be on the K2 lab, she is negotiating with K1, still not clear.

Tehmina has asked for help from all department leaders (including OGS), but with no success.

In summary from CIH: We are shocked that Tehmina is denied lab space, and will support her every way we can. We will contact Bjarne – and it will be discussed in the CIH board meeting in December.
