Agenda: No type of harassment is tolerated at CIH

Bente and Guri held both short presentation reminding everyone of the importance of a safe work environment for both physically and psychosocially wellbeing. As a starting point for an open discussion on how to ensure such an environment at CIH Bente introduced a new report with results from a national survey on harassment in the university sector in Norway.

<https://pahoyden.no/ansatte-mellom-50-59-ar-fole-seg-mer-mobbet-og-trakassert/400624> (The report is only in Norwegian). Almost half of the persons who report to have experienced harassment tell that **colleagues** have participated in the harassment. This report has been commented by our Rector Dag Rune Olsen, and he raises some important questions. He ask: Kan måten man debatterer på i denne sektoren gi noen ekstra utfordringer? (Can our **way of debating** scientific topics give some challenges?) - Spørsmålet er om debattene av og til kan være noe annet enn faglig uenighet?
